

EasyView
MT8000 **iE** / **XE** Series

Professionals in Human Machine Interface

*Provide a variety
of sizes of HMIs*

iE-Series 4.3" / 7" / 10.1"

- Ultra-slim form factor enables MT8000iE-Series can be installed in any industrial application environment.
- Brand new look and color design with perfect aesthetic sense.
- Equipped with powerful Cortex A8 600MHz CPU.
- Built-in isolated RS-485 interface ensures the HMI reliability in any complicated grounding environment. (MT8050iE & MT6070iE excluded)
- PCB coating protection to prevent moisture corrosion in harsh environments. (MT6070iE excluded)
- Comply with IP65 rating and CE testing standards.
- Offer more than 250 drivers to connect with various controllers.

IP65
PCB coating
CE
Isolated RS-485

Improve performance in all aspects

XE-Series 12.1" / 15"

- Two large sizes of HMIs (12.1", and 15") are optimal for industrial control application in various environments.
- Aluminum enclosure shows exquisite appearance.
- High-resolution (1024 x 768 pixels) with 16.2M colors display.
- Equipped with powerful Cortex A8 1GHz CPU.
- Built-in isolated RS-485 interface ensures the HMI reliability in any complicated grounding environment.
- PCB coating protection to prevent moisture corrosion in harsh environments.
- Comply with IP65 rating and CE testing standards.
- Offer more than 250 drivers to connect with various controllers.

CE
Cortex A8 1GHz
IP65
Isolated RS-485
PCB coating

Built-in isolated RS-485

In industrial control environments, the ground voltage of each device may be different. When connecting multiple devices such as a PLC, Servo and Inverter to the RS-485 port of the HMI, the ground voltage difference of these devices may damage the interface components. Thus, the built-in isolated RS-485 design can effectively avoid the ground potential difference problem and ensure your HMI durable in any complicated grounding environment.

RS-485 (Isolated)

Aluminum Enclosure

Aluminum enclosure greatly improves the reliability of the XE-Series.

	iE-Series				XE-Series	
	MT8050iE	MT6070iE	MT8070iE	MT8100iE	MT8121XE	MT8150XE
Isolated RS-485			•	•	•	•
Aluminum Enclosure					•	•

PCB Coating Protection

As the electronic component gets smaller, the copper wires of the PCB are getting thinner. The thin copper wires result in corrosion of PCB easily, especially in harsh environments with high humidity, corrosive air, etc. Thus, to prevent the PCB corrosion, using the PCB coating can enhance the strength of the damp-proof, dust-proof and corrosion resistance in any harsh environments.

Comply with IP65 rating and CE testing standards

WEINTEK iE-Series and XE-Series are all rated to IP65 and in compliance with CE testing standards to ensure long life and durability for optimum performance.

Advanced Operation

Fast Display

Fast Window Change

Rich Color Display

Equipped with powerful Cortex A8 CPU

- The HMIs that are equipped with the A8 CPU have set a benchmark record such as booting speed, JPEG file display speed, and speed of PLC data read/write.
- High speed of communication improves the efficiency of database operations.
- Fast change a window which contains many complex objects.
- With 16.2M colors display, the HMI shows realistic graphics and operating objects that enable plant personnel can quickly control the on-site status.

EasyBuilder Pro

Powerful, Easy to Use

- Continually update and improve the user interface and functions based on diverse usage behaviors.
- Fully-compatible with EasyBuilder 8000, thus it reduces the software switching cost.
- Off-line simulation to preview the result without connecting an HMI and a PLC.
- All the graphics are embedded when uploading/downloading the project file.

1 Function Bar

- Grouped by different functions and shown in simple icons to facilitate the usage.

2 Window Bar

- Show the number of windows and their names.
- Show all the object names and addresses that a window contains.
- **Window Preview** can preview all the display of windows.

3 Main Window

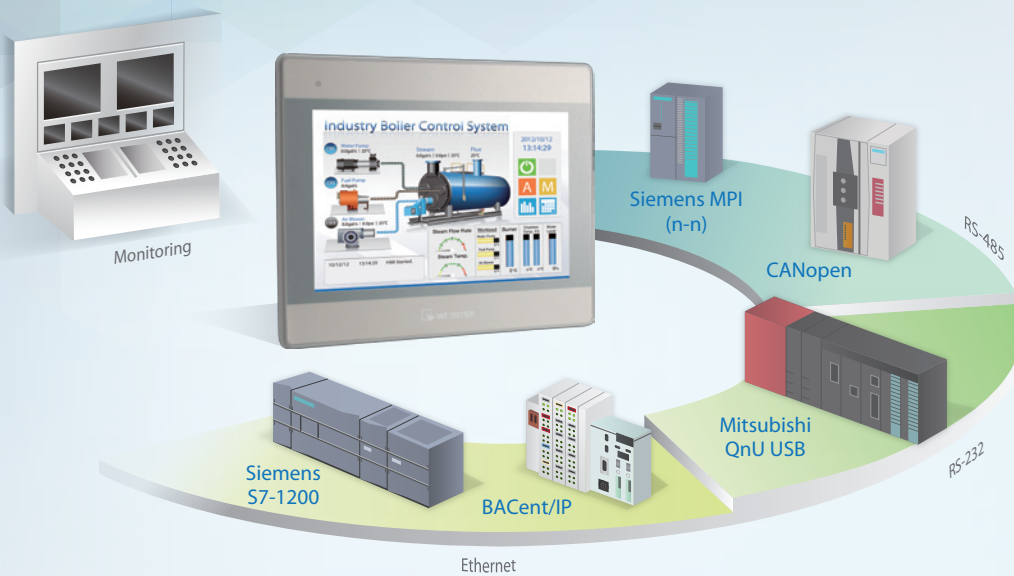

- Easy to create any functional objects and design the user interface.

Extensive Graphic Libraries

- Built-in sufficient high-quality graphics to fulfill your need.
- Support to import different graphic types included gif, bmp, jpg, png, and svg.

Support more than 250 Communication Drivers

The HMIs are not only equipped with RS-232/RS-485(2W and 4W) and the Ethernet(10/100M Base-T), but also support more than 250 communication drivers to connect to most of PLC, Servo, Inverter, temperature controller, barcode scanner, etc. on the market. Those features are well-suited for industrial environments and can be a perfect solution to monitor and control your system.

Built-in various Communication Interfaces

- USB Host Port
 - Download a project to the HMI or Upload it from USB drive to PC.
 - Save historical data and event log to your USB drive.
 - Connect to a mouse, printer, barcode scanner, etc.
- USB Client Port
 - Download a project to the HMI or Upload it to your PC.
 - Upload the historical record.
 - Upload/Download recipe data.
- SD Card Slot
 - Download a project to the HMI or Upload it from SD card to PC.
 - Save historical data and event log.

Redundant Network

- When multiple HMIs connect to corresponding PLCs, if one of HMIs is out of service, the PLC will be controlled by the other HMI instantly. Thus, this feature greatly improves the availability and the reliability of HMIs.

Modbus TCP/IP Gateway

- Since the MODBUS is the most widely used protocol in industrial control, most SCADA software supports the Ethernet Modbus TCP/IP.
- After mapping the address of MODBUS TCP/IP and PLC in EasyBuilder Pro, the SCADA software can directly read or modify PLC data via MODBUS TCP/IP protocol.

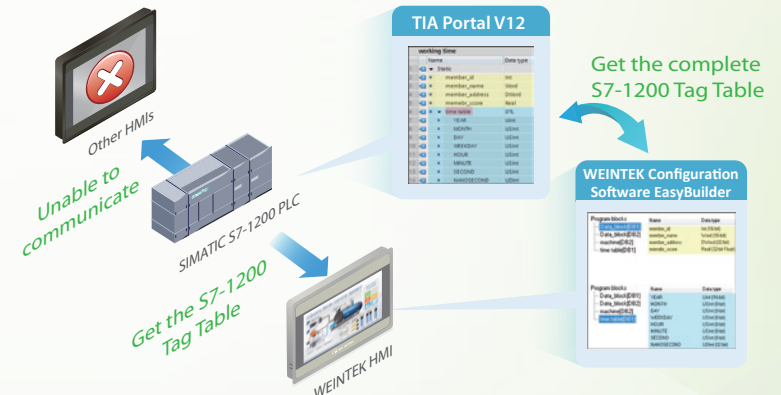

Pass-Through Communication

- Do HMI programming by connecting your computer.
- Do project on-line simulation by connecting the HMI to the PLC.
- Program the PLC without disconnecting the PLC from the HMI.
- Download the revised PLC program through the HMI to the PLC.
- Implement in either COM Port or Ethernet mode.
- Supported PLCs included : DELTA DVP, FATEK FB Series, LS XEC/XGI CPU DIRECT, Mitsubishi FX0s/FX0n/FX1s/FX1n/FX2, Mitsubishi FX3u/FX3G, Mitsubishi Q00U/Q01U/Q02U/QnUD/QnUDH, OMRON CJ/CS/CP, Panasonic FP, etc.

Get the complete PLC Tag Table

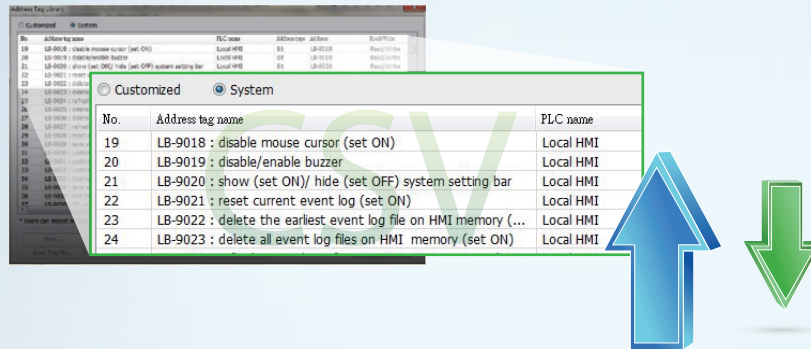

- Support the Tag-table of PLCs included SIMATIC S7-1200, OMRON NJ-Series, and Allen-Bradley. This feature greatly reduces the project development period and improves your programming efficiency.

Modbus TCP/IP Gateway	•		•	•	•	•
Support PLC Tag Table	•		•	•	•	•

Address Tag Library

- Create a list of tag names assigned to corresponding PLC addresses in order to make those PLC addresses more readable.
- Tags can be easily imported and exported as CSV files.

Macros

- Similar to VB-Script, you can design a desired feature.
- Support the user-defined protocol to connect with other communication devices.
- Perform arithmetic operations, logical operations, and string manipulations.
- Execute regular or repeated commands to reduce program loading time.
- The user-defined function improves the flexibility of Macro Library.

- **Operators** | Arithmetic, Comparison Logic, Bitwise & shift
- **Variable Types** | Boolean, 8-bit char, 32-bit float, 32-bit integer, 16-bit integer
- **Math Functions** | ASIN, ATAN, COS, COT, CSC, SEC, SORT...
- **Data Conversion Functions** | ASCII2DEC, ASCII2FLOAT, ASCII2HEX, BCD2BIN, BIN2BCD, DELAY, RAND
- **Communications Functions** | INPORT, GetData, SetData, OUTPORT
- **Data Manipulation Functions** | FILL, GETBIT, HIBYTE, HIWORD, LOBYTE, LOWORD, SETBITOFF
- **Other Functions** | DELAY, RAND

Label Tag Library

- Enable a multi-language environment, included : Traditional Chinese, Simplified Chinese, Japanese, Korean, German, French, Spanish, Portuguese, Italian, Arabic, etc.
- Support up to eight different languages at the same time.

Recipe Database

- A Recipe is a collection of data of the same attributes records that are stored in a non-volatile memory
- Provide sufficient and secure recipe data storage to ensure that those data are intact and secure under any circumstances.
- Provided visual objects enable you to transfer recipe data by pressing buttons intuitively.
- Recipe Database can be created, edited, and deleted by Macros.
- All the recipe records can be on-line updated and monitored to ensure the accuracy and consistency of data.

Enhanced Account Management

- Up to 127 user accounts can be added. The user passwords must be alphanumeric.
- Each object or function can be set a security class (Class A to Class L) and each user can be assigned one or more security classes to control the object. Administrator has privileges to operate all objects and functions.
- The features of adding temporary account, setting the account priority, and importing user accounts from SD card or USB greatly improve the flexibility of account management.

USB Security Key

- Automatically log in the HMI after inserting your USB which is stored a default account and its password.
- The default password will expire in a specified number of days.

Project Security

- Decompiling Limitation : Either prevent decompiling of a project, or set a password when compiling your project to prevent unauthorized decompiling.
- Project Password : Secure your project and prevent it from being modified without the correct password.
- Project Key : The project is restricted to run on a specific HMI. It is identified by the project unique password (Project Key) and its HMI matching password (HMI Key).

Operation Log

- Each operation will be logged in operator historical records and saved in CSV files in order to track changes.
- Save to a CSV file and help the review and investigation of important events.
- Print to hard copy for the signed agreement.
